

THE FROG

A dedication to O.C. Newman's sprightly bronco (so named for his wild leaps).

A Note From Your CEO

This morning I joined Tyson Bullard bright and early, on our local radio station, for a joint conversation regarding a continuation of tax assistance to fund a much needed elementary school rebuild. This sparked a deeper conversation on the importance of investing in our community's future. The hospital as a leading employer of the county relies heavily on cultivating our workforce locally. Oklahoma is growing rapidly, as contiguous counties around the city are seeing the greatest gains north of 2%. In analyzing the drivers of growth; commonalities with cities across the country who are experiencing economic growth are fueled by public investment. Public investment, is a fundamental element of our nation's saving and investment identity. It's also a major driver of private economic activity. The two top feeders of public service are Education and Healthcare. In order for long-term sustainment to exist for our rural community, we must be progressive in our advancements with respect to our educational institutions and healthcare facilities. On a personal note, when we were analyzing the opportunity of joining Newman the first place we looked at was the hospital's capability, potential and historical trends. Additionally, we were highly motivated by the schools and the education our children were going to receive. Lastly, housing and the availability of such was paramount.

Every day we ask our Educators to prepare our youth for the future needs of our society and local community. It's important we equip our educators with the tools they need and provide an environment that is highly conducive to learning. This is exactly what Tyson is lobbying to do but needs our community support. We will be asked to vote on the continuation in a few months and we should think constructively as we cast our vote. This vote affects more than the school but also our hospital, private businesses, our beliefs and way of life. We live in a beautiful place filled with morals and core values we see diminishing in parts of our country. Let's work together to protect and progressively build our presence together. Just as we are doing with The Little Mayo...Newman Memorial.

~ Tom Vasko, CEO

WE ARE HIRING!

Positions Currently Available:
